

May 30, 2008

Dear Parents,

Summer vacation is here! Most of us are looking forward to having a break. It will give us the time we need to rest and get ready for the next school year. During this time, it is important for all students to stay both physically and academically active in order to be ready for the next upcoming school year.

Going from second grade to third grade is a big transition for most students. In order to make this transition easier for the students, I have attached a math requirement sheet. This sheet is to help you and your child prepare for third grade. The items on the math sheet are things that your child should know before entering third grade. If he or she does not know some of the information please review it with them so they know it. Also, I recommend that you review all of the information with your child even if he or she does know it. This will set your child up for success.

In addition, I have attached the supply list along with some assignments that I would like for your child to complete over vacation. **They will be due on the first day of school.** Attached are:

- Two multiplication worksheets (Students should know their 2's, 5's, and 10's multiplication facts before the school year begins.)
- One book report worksheet (A reading list is attached. The list gives you an idea of books that are at a third grade level. Your child does not have to read a book that is on the list. They may choose their own book).
- One Language Arts worksheet

Please remember, your child does not need to do all of the work in one day. Please have your child work on the packet throughout their vacation.

Thank you for all your help! I anticipate that this will be a great year. I look forward to seeing all of you in August. Have a wonderful summer!

Thank you,

Miss Dumlao  
Third Grade Teacher
